

Pre-shipment inspection checklist

Agree the inspection scope and defect criteria before goods are dispatched.

Mark your priorities. Items outside the agreed scope are not included in the results.

Date	Product	Prepared by
------	---------	-------------

Inspection method

N/A []

- ☐ Total quantity and quantity to inspect
- ☐ Full inspection or sample inspection
- ☐ Sampling method and permitted package opening

Function & dimensions

N/A []

- ☐ Operation, assembly and accessory checks
- ☐ Measurement points and allowable tolerances
- ☐ Approved sample or reference images for comparison

Appearance & quantity

N/A []

- ☐ Matching colours, specifications and quantities
- ☐ Acceptable stains, scratches and damage
- ☐ Packaging, label and barcode placement

Results & approval

N/A []

- ☐ Required photo angles and close-up views
- ☐ How defect quantities and types are recorded
- ☐ Re-inspection or dispatch approval criteria

Inspection limitations

Sample inspection does not guarantee that every unit is defect-free. Performance, safety and certification tests requiring specialist equipment are separate from general inspection. Results cannot be assured for items not agreed in advance.

Prepare for consultation

Approved sample or reference images / Dimensions and defect examples / Required photo list

Consultation notes and outstanding questions
